Personal Profile

Second-year B.Tech student in Artificial Intelligence Machine Learning with experience in full-stack web development and AI-powered applications. Built projects such as a Business CRM system and an AI Resume-Job Description Matcher using React, Next.js, Node.js, Supabase, and Hugging Face APIs. Interested in developing scalable applications that integrate AI technologies.

Education

2024 – 2028: B.Tech - Artificial Intelligence and Machine Learning

Aditya University, Surampalem

GPA: 8.89

2022 – 2024: Intermediate

Nagarjuna Junior College, Tiruvuru

GPA: 9.73

2021 – 2022: 10th

Nagarjuna E.M High School

Percentage: 91%

Projects

BIZCRM – Business CRM Management System | 2026

Next.js, React, Supabase, PostgreSQL, Node.js, Vercel

- Developed a role-based CRM web application to manage organizations, teams, and workflows.
- Implemented secure authentication and authorization for Admin, Manager, and Team Member roles.
- Built an email invitation system for onboarding users using SMTP verification links.
- Integrated Supabase for database management and authentication services.
- Deployed the application on Vercel with GitHub-based CI/CD workflow.

AI Resume – Job Description Matcher | 2026

Python, Hugging Face API

- Developed an AI-powered application to match resumes with job descriptions.
- Integrated Hugging Face API to analyze resume and job description text using pretrained language models.
- Implemented similarity scoring to evaluate skill and experience relevance between resumes and job roles.
- Built a web interface for uploading resumes and job descriptions for automated analysis.
- Generated compatibility scores and improvement suggestions to help optimize resumes.
